

Capturing every moment possible is a must in our world today, so it is obviously important on your wedding day! Everyone wants to get the most unique perspectives and more behind the scene shots. A huge trend for weddings and any sort of event is to record videos with a “selfie stick” or a GoPro camera.

Pictures done by a professional are always a must, but adding the unique and candid feel from a GoPro will give you even more memories, but from a different angle. A GoPro or any similar camera can be given to a groomsman or bridesmaid and capture shots from before the wedding and even on the dance floor.

So grab your GoPro and “selfie stick” and say cheese!
